

## Press Release

### **Valentine's Gift : Wooden Heart Hand**

- ▶ Make a wooden heart hand to send to your lover on Valentine's Day
- ▶ Step by Step using the Dremel Stylus

**Get creative and give beautiful gifts that look equal to any you could buy in a shop for a fraction of the price! Take your Dremel Stylus and create a beautiful wooden heart hand to send to your Valentine.**

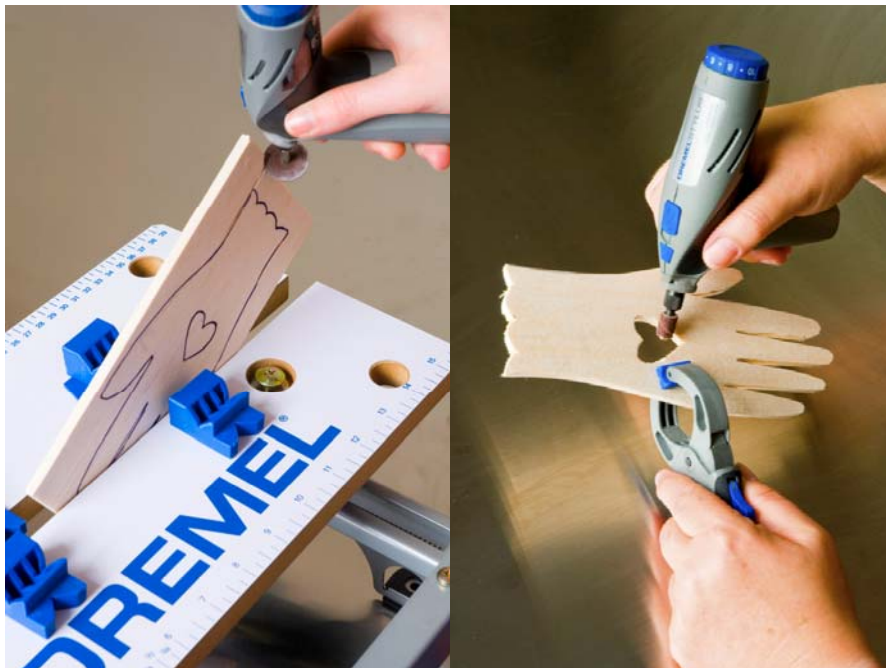

### **Materials required :**

Dremel Stylus, drill bit and engraver bit  
Sanding band 430 and SpeedClic cutting wheel attachment  
Dremel Project Table  
Balsa wood  
Pencil  
Paint  
Paintbrush  
Ribbon

### **Step One**

Draw a hand shape onto the balsa wood. Cut out the hand using the Project Table to hold the wood in place, cutting carefully around the fingers using the Dremel Stylus with a SpeedClic cutting wheel.

Cut out a heart shape in the middle of the hand roughly and then smooth the inside of the shape with the Dremel Stylus and the sanding band 430 accessory for a neat finish.

### **Step Two**

Sand the edges of the hand using the Dremel Stylus and the sanding band 430 accessory. Apply gentle pressure so that you do not damage the balsa wood hand. Drill a hole to hang the hand using the Dremel Stylus and the drill bit. Paint both sides of the hand, making sure that between the fingers is coated. Leave to dry. Apply a second coat of paint if necessary.

### **Step Four**

Using the Dremel Stylus and an engraver tip, decorate the hand. Make dots around the heart and on the fingers and across the top. Thread ribbon through the hole to hang the hand.

## Finished Project

Dremel products can be purchased from DIY stores as well as online at:  
<http://www.dremel-direct.com> or <http://www.tool-shop.co.uk>

## About Dremel

Dremel was founded in 1932 by AJ Dremel who introduced the world's first multitool. Today, it is dedicated to creating and manufacturing high speed rotary tools of the finest quality for consumers engaged in a wide variety of hands-on DIY & creative hobbies, such as, indoor and outdoor home maintenance projects, automotive restoration, woodworking, model building, as well as a multitude of creative projects from jewellery making to scrapbooking. The Dremel core product line is defined by the Dremel multitool, a versatile high speed motor unit which can be used to drive a system of over

150 available Dremel accessories and attachments. Over the years, the Dremel brand has brought other user-friendly products onto the market, such as, glue guns, engravers, clamps, worktables and butane torches. Dremel products make it easier to perform detailed and intricate tasks for any kind of hands-on project. Dremel. Big on Detail. For more information go to our Virtual Press Office located on [www.dremel.com](http://www.dremel.com). Dremel is part of the Bosch Group represented in around 50 countries worldwide.
