NEW

DREMEL® 400 SERIES DIGITAL

NEW

Dremel is the inventor of the famous multi tool system, which you can use on a great number of projects where detail and precision is required. Use indoor and outdoor for DIY, hobby or creative projects. We have a system of tools, accessories and attachments which allows you to become efficient in handling your projects.

NEW & IMPROVED

DREMEL 300 SERIES

The Dremel 300 Series is the newly designed Dremel multitool, unique for its ergonomic design, offering the user a comfortable grip with a convenient lightweight housing. The Dremel 300 series is the ideal tool for users that like to perform detailed tasks, whether occasionally or regularly. Use the high quality Dremel accessories and attachments to discover numerous possibilities: detailed sanding, precise routing, polishing for a great finish or even cutting through all kinds of materials, the only limit is your imagination.

With the Dremel 300 series, Dremel offers great quality at a very affordable price.

Features and benefits

- **Second attachment interface - To attach DREMELite**
- **Soft grip - For reduced vibration and a better grip**
- **New and unique design - Improved ergonomics and increased comfort**

DREMEL 400 SERIES DIGITAL

The Dremel 400 Series Digital is the perfect multitool for projects that require the utmost precision. Thanks to the unique digital display, you can work precisely on several materials that require different speed settings, either low or high. Combined with the convenient tool design, this multitool is the perfect partner for every job demanding precision and control. Restoring delicate parts in antique furniture, on detailed woodworking, polishing chrome on low speed, or drilling miniature holes in several materials; this tool is an absolute must for the most demanding craftsman.

The Dremel 400 Series Digital: maximum precision and control.

Features and benefits

- **Variable speed control 5.000 - 33.000 RPM - For exact speed adjustment in 1.000 RPM increments**
- **LCD display - Shows exact speed settings**
- **Soft start function - Improves the lifetime of the motor**
